Clinical experience shows Libido Boost Herb Packs enhance;

- Libido and sexual desire
- Stamina and sensation
- Orgasms and climaxes

Epimedium and its health benefits (AKA Horny Goat Weed)

Epimedium’s flavonoid icariin is presumed to be mainly responsible for some of this botanicals unique actions.

wellness for centuries™

Epimedium/ Horny Goat Weed: Clinicians say horny goat weed is unsurpassed in TCM for sex enhancement! It is the very best sexual tonic for both men and women. The leaves of the plant contain a variety of flavonoids, polysaccharides, sterols and an alkaloid called magnafloine. And while the exact way horny goat weed works remains unknown, the plant has long been employed to restore sexual fire and boost erectile function. Epimedium is also well studied for improving bone density. Traders estimated sales of over 100 tons per year are currently sold worldwide. All epimedium is picked wild and only leaves of the plant are used.

The Herb **Cistanche** also known as **Rou Cong Rong** is translated as **meaning essence**. It was first mentioned in the Shen Nong Ben Cao Jing around 100 AD. It has been compared to Viagra, but it's all natural. The actions from the volatile oils and non-volatile phenylethanoid glycosides (PhGs), oligosaccharides and polysaccharides in Cistanche have proven an fertility treatment and beneficial for premature ejaculation, frequent urination, weakness of tendons, impotence and more.

Libido Boost Herbs

- **Can Be Used Long Term SAFELY & EFFECTIVELY**
